

CORE SIDE

A technical drawing showing a cross-section of a multi-layered structure, likely a pipe or vessel wall. The drawing is symmetrical about a central vertical axis. It features several concentric layers. The outermost layer is a thick, solid ring. Inside this, there is a thinner layer, followed by a layer with a series of vertical lines, possibly representing a corrugated or ribbed surface. The innermost part of the structure consists of several vertical, cylindrical or rectangular elements arranged in a row, which could be internal stiffeners or part of a support structure. The drawing is a line drawing with no shading.
